

## CUSTOM-MADE HARVESTING AND TRANSPORT TRAILERS

- ProduceTech offers a full range of trailers adapted for your needs. All trailers are custom-made according to your specifications.

### HARVESTING TRAILERS

- Trailers can hold from 3 to 6 bins, depending on the model. They accept loads of 1500-5000 kg (3307-11023 lb). Trailer width is adapted to the space between rows in the orchard or vineyard.

The unloading ramps fold onto the bins to ensure secure transportation and preventing the load from shifting.

The unloading ramps are equipped with running boards to help pickers fill the bins quickly.

Upon request, security features such as turn signals or pneumatic or hydraulic brakes can also be installed.

Trailers include:

- Rollers to facilitate bins loading and unloading.
- A smart drawbar attached to the three-point hitch helps turning tight corners and easily lift the trailer from the cab.

- The **TEL** model is a telescoping trailer which can pick up full bins from the ground. No need for a forklift in the orchard, pick up the bins directly with the trailer.

It is the perfect option to integrate to a picking platform in order to optimize harvests.

This model can also be equipped with running boards for pickers.

### TRANSPORT TRAILERS

- The **PCR25** model is designed to carry harvesting bins from the field. It can carry between 3 and 5 bins, depending on the model. Its maximum width is 125 cm (4'1"), allowing it to circulate easily between rows.

- The **PBC/3** model is designed to facilitate transportation of plastic crates from the field. They can be loaded and unloaded from both sides. Transport is secure thanks to the aluminum frame on both sides and at the back. A double axle ensures stability during transport.

Both the PCR25 and PBC/3 models can be equipped with a smart drawbar.

## STAINLESS STEEL TRAILERS

Stainless steel ASI 304 trailers are designed to carry fruits for processing, specially grapes from the vineyard. Stainless steel has the advantage of being easy to clean and is ideally suited for food products. These trailers can transport liquids without spilling.

- The **SCISSORS** trailer is designed to carry grapes directly from the vineyard to the winery. Grapes can be harvested by machine or by hand. Lifting and opening of the trailer is done from the tractor cab. The trailer includes a fixed drawbar and an adjustable support foot.

MODEL	CONTAINER LENGTH	WIDTH	HEIGHT	MAXIMUM HEIGHT	CAPACITY
D/DF 13	300 cm / 10'11"	130 cm / 4'3"	130 cm / 4'3"	300 cm / 10'11"	1 700 kg / 3 748 lb
D/DF 16	300 cm / 10'11"	160 cm / 5'3"	130 cm / 4'3"	300 cm / 10'11"	2 500 kg / 5 512 lb

- The **AF RR** stainless steel trailer is also designed to carry grapes or fruits from the field. Lifting and opening is done from the tractor cab. For transporting liquids, a **PARA FLUIDS** option can be added to avoid the content from spilling over the top of the trailer.

MODEL	LENGTH OF BED	WIDTH	HEIGHT	CAPACITY
AF RR INOX 35x18	350 cm / 11'6"	180 cm / 5'11"	170 cm / 5'7"	5.5 m <sup>3</sup> / 194 ft <sup>3</sup>
